SUMMARY

Software Engineer with 2+ years of experience in full-stack development, AI integrations, and backend systems. Skilled in React, Node, Spring Boot, and FastAPI with strong CS fundamentals.

WORK EXPERIENCE

APPLICATION ENGINEER, IDFC FIRST BANK (Chennai, India) Sep 2025 - Present

- Contributed to AAMOS, a banking **AML alert and investigation platform**, integrating case tracking, role-based workflows, and multi-level escalations to improve case traceability and team coordination.
- Worked on replacing the legacy AML platform with an in-house solution using **Spring Boot, MongoDB, Elasticsearch, Temporal**, and **FlutterFlow**, with an estimated **55–60%** reduction in annual licensing costs while supporting AML operations across branches in India.
- Developing an **agentic AI-powered Jira automation** workflow using **LangGraph**, where moving tickets to a dedicated “AI Development” lane triggers automated analysis of ticket context, application logs, and relevant source code, followed by automated code-fix proposals and pull request creation in Bitbucket.

SOFTWARE ENGINEER INTERN, PINELABS (Mumbai, India) Sep 2024 - Sep 2025

- Designed and developed an end-to-end **KYC system**, reducing Operations team workload by **93%** through automation of promoter verification using REST and third-party API integrations with **Spring Boot**.
- Led end-to-end development of **Task Management App** using **FastAPI** for task assignment, geo-fencing check-ins, attendance tracking, and reporting, reducing manual coordination efforts by **90%**.
- Built a **multilingual AI assistant** in 7+ regional languages with **LangGraph** and Agentic Framework, **increasing sales revenue** by reducing merchant intervention and enhancing customer engagement during in-store purchases.
- Optimized **POS backend** workflows, including **charge slip generation** and **IMEI/SKU scanner**, resulting in improved transaction processing efficiency and a **40%** increase in scanner speed and prompt handling.

ASSOCIATE PROGRAMMER ANALYST INTERN, MOODY'S (Bengaluru, India) Jun 2024 - Aug 2024

- Familiar with C# and Unit Testing, effectively utilizing NUnit and Moq frameworks to significantly improve line coverage **from 24% to 98%** and gain experience in agile methodologies.

UI/UX DESIGNER INTERN, AGUMENTIK GROUP OF COMPANIES Jun 2023 - Aug 2023

- Conducted usability testing with **200+ users** and collaborated with cross-functional teams to design a service booking app UI, reducing support inquiries by **50%** through optimized wireframes and prototypes.

SKILLS

Coursework	Data Structures and Algorithms, Object Oriented Programming, Operating Systems
Web Development	HTML, CSS, JavaScript, ReactJS, Node js, Express js, Spring Boot, FastAPI
Databases	MySQL, PostgreSQL, MongoDB
Languages	C++, Python, Java
Tools	VS Code, IntelliJ IDEA, Postman, Git, GitHub, Figma, Bitbucket, AWS
AI & Agentic Frameworks	LangGraph, CrewAI
Soft Skills	Communication, Leadership, Teamwork, Problem-Solving

PROJECTS

DEV LAUNCHPAD - React, Node.js, TypeScript, WebContainer API, LLM Integration [Github](#)

- Recognized the need for an in-browser AI development environment where users can generate, edit, and preview full-stack applications without local setup.
- Built an AI platform that generates full-stack applications from prompts and runs them in a browser-based WebContainer, using reusable startup to reduce setup time and launch live previews almost instantly.

BLOCKCHAIN BASED CROWDFUNDING PLATFORM - *Ethereum, Solidity, MetaMask, React*

[Github](#)

- Identified the need for a transparent crowdfunding system ensuring accountability and prevent fraud.
- Developed a Web3 crowdfunding platform that enabled detailed campaign creation, real-time tracking for transparency, and trust, while ensuring optimized performance.

VIRTUAL ASSISTANT - *Python*

[Github](#)

- Automated various tasks by crafting a voice-based AI assistant with Python, integrated with the web to deliver real-time responses with efficiency and accuracy.

EDUCATION

2021 – 2025	SRM University, Andhra Pradesh, India Bachelor’s Degree in Computer Science and Engineering (CSE)	CGPA: 9.26/10.00
2021	Sri Chaitanya Junior College, Andhra Pradesh, India Class 12th (MPC – Mathematics, Physics, Chemistry)	Percentage: 98.50/100.00
2019	St. Joseph’s High School, Andhra Pradesh, India Class 10th	GPA: 10.00/10.00
